# Connor Panayi

**Forward Deployed Creative Technologist | Product Builder | AI & Audio**

London / San Francisco | connor.panayi@gmail.com | +44 7805 406043 | linkedin.com/in/connor-panayi-40a3913ab | panayi.me

## SUMMARY

Creative technologist and product builder who embeds with users, learns the domain fast and ships production software end to end. Solo-shipped 20+ products (AU/VST3 plugins, macOS apps, web apps) integrating Claude, MCP, ElevenLabs, local LLMs and audio ML. 0-to-1 product and partnerships leader in AI IP infrastructure ($2.5B FDV at launch) and music streaming. Grammy-recognised producer and engineer with 16B+ streams for Coldplay, BTS and The Rolling Stones.

## EXPERIENCE

**Co-Founder & Co-CEO, MineFM** **Aug 2024 - Present**
*Social music discovery platform* *New York, NY / Remote*

- Took the product from concept to live launch, owning strategy, roadmap and the social and curation experience.
- Raised early-stage funding and built and led a cross-functional design and engineering team.

**Head of Music, AI & Infrastructure, Camp Network** **Jan 2025 - Feb 2026**
*AI-native IP infrastructure platform* *New York, NY / Remote*

- Led 0-to-1 delivery of infrastructure connecting creative IP to AI training and generative workflows ($2.5B FDV at launch).
- Designed a tokenised IP framework onboarding creative assets and metadata for AI training, with attribution and monetisation for rights holders.
- Owned AI ecosystem partnerships and technical integrations, shaping the roadmap with AI researchers and engineers.

**Head of A&R & Artist Partnerships, Sonu Stream** **Jan 2022 - Aug 2024**
*Artist-first streaming platform* *New York, NY / Remote*

- Onboarded millions of catalog tracks via label and distributor deals; primary liaison between artists, labels and engineering on UX/UI, rights management and distribution tooling.

**Record Producer & Engineer, Independent** **Oct 2013 - Present**

- Produced and engineered records totalling 16B+ streams for Coldplay, BTS, The Rolling Stones, Florence + The Machine and Mark Ronson; multiple Grammy nominations. Recording Academy Voting Member; Producers & Engineers Wing.

## SELECTED PRODUCTS (DESIGNED, BUILT AND SHIPPED SOLO) | PANAYI.ME

**Overkill & OK Instruments** | *C++20, JUCE, Faust, LLVM JIT, Ollama, AU/VST3*

- Commercially released plugins that turn a text prompt into a playable effect or synth: a local LLM writes Faust DSP, LLVM JIT-compiles it, and an offline test harness feeds failures back for up to 6 self-repair attempts before hot-swapping it live.

**Patch V2 (UAD Patch)** | *C++20, JUCE, Spectral DSP, AU/VST3 Hosting, Universal Audio UADx*

- Rebuilds any sound as a playable instrument and effects chain by mapping spectral analysis onto a knowledge base of 58 UADx plugins and 1,828 parameters. Refocused from a generic V1 onto one ecosystem, driving stronger traction.

**GrooveDNA** | *JUCE, Claude API, Splice MCP Server, Tool Calling*

- Drum sampler where Claude turns a phrase like "Questlove but tighter" into groove and kit targets, then calls Splice's MCP server as tools to source each drum voice, with offline fallback.

**ElevenIdeas** | *ElevenLabs API, JUCE*

- DAW plugin integrating 5 ElevenLabs endpoints to turn one clip into 11 song-aware melodies, harmonies and re-sung lines.

**Echo Map & RADA/R** | *YouTube Data API, Spotify Web API, Deezer, iTunes, Reddit, CLAP Embeddings, Claude*

- Music intelligence web apps: Echo Map models replay and skip data into a "fan fingerprint" that scores unreleased drafts; RADA/R uses CLAP embeddings to detect rising sonic trends daily.

**Also shipped:** Fadie (Swift, Apple Vision, CoreMIDI), Chops (CLAP semantic search, LALAL.AI API), Blueprint (YAMNet, Claude), LLS (Lemon Squeezy licensing), UnderTone, Sumi, slopworthy.xyz.

## SKILLS

**AI & Integrations:** Claude API, Model Context Protocol (MCP), Tool Calling, Agentic Workflows, ElevenLabs API, Local LLMs (Ollama, llama.cpp), CLAP, Prompt Engineering, REST APIs
**Engineering:** C++20, JUCE, Swift, Faust, LLVM, Audio DSP, AU/VST3, CoreMIDI, Computer Vision, SQL, Claude Code
**Product:** 0-to-1 Product, Product Discovery, User Research, Roadmapping, Prototyping, GTM, Stakeholder Management
**Domain:** Music Rights & Metadata, AI Data Provenance, Logic Pro, Ableton Live, Music Production, Mixing
